We help you select the best keyword targets to raise your position in the search results of each of the major search engines. We will work with you in order to maximize your SEO potential

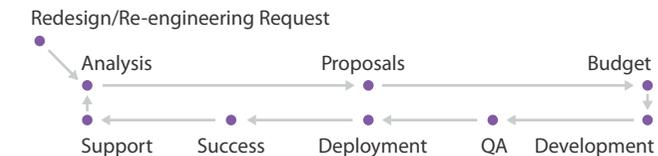

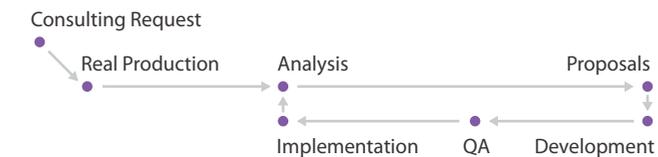

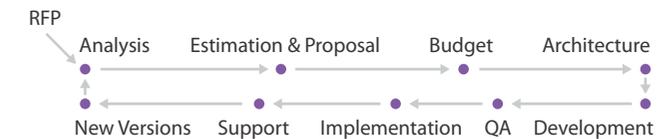

Key Technologies

Workflow

The variety of projects has brought about a wide range of engagement models, working schemes and types of workflow. At X-mx Infosoft we provide each project with individual workflow – everything works in the way most convenient to you. We are flexible and have enough experience to implement almost any kind of workflow preferred by the client.

Examples of workflow schemes

Methodologies

We endeavor to apply fundamental yet personalized approach to every customer and their project. For example, we use a long-reputable Waterfall method of software development as well as cutting-edge Agile, Scrum and Kanban methodologies.

Waterfall development method is ideal for projects with clear task formalization and xed scope of work, i.e. for small and medium-size projects. Waterfall methodology comprises the following steps:

- working out system requirements, drawing up and approving the specification;
- design and prototyping;
- development;
- delivery;
- support

Agile, Scrum, Kanban, etc. methodologies have their own distinctive features.

Integrated Solutions

Products

Apart from being engaged in offshore software development projects and outsourcing IT services for our global customers we succeed in finding time and resources to develop our own products and take pleasure in making them highly competitive, valuable and innovative. We endeavor to implement our creativity and technological ideas in our own products.
